## ABOUT US

BER AL HAWIRA is one of Oman's leading companies offering SS Fabrication, Stainless Steel Fabrication, SS Cladding, Wall Cladding, Lift Cladding, and Laser Cutting services. We were established in 2015. It is our company's mission to complete projects with 100% customer satisfaction with highly skilled employees. The company has in-house machine facilities, including Laser Cutting Machines, Rolling Machines, Hydraulic Shearing Machines, and Bending Machines. Taking care of the customer and completing the project on time are the top priorities for the company.

## LASER CUTTING MACHINE

Economical Fiber Laser Cutting Machine is a high-performance sheet metal laser cutting machine which is good at cutting metal and sheet metal effectively. This machine is an ideal entry level laser cutting machine.

## ROLLING MACHINE

The upper roller can move up and down, and horizontally. Moving up and down adjusts the bending rate, moving horizontally completes pre-bending, needn't add press machine. It can be feed once, you can complete pre-bending and form bending without turning round. And can correct the forming workpiece.

High precision pre-bending

It can set the length freely, upper roller presses directly, can complete high precision pre-bending.

Excellent product precision

The upper roller is in the shape of drum, there are auxiliary rollers to support the adjusting. It can make excellent rolling products with thin to thick metal plates.

## HYDRAULIC SHEARING MACHINE

CNC plate guillotine shearing machine provides high strength, high productivity, high precision, and safety to improving your bottom line. High precision CNC plate shears adopt the latest computer technology, compact structure and complete functions characteristic.

## OUR SERVICE

- ◆ SS Fabrication
- ◆ Ms fabrication
- ◆ SS Cladding
- ◆ Wall Cladding
- ◆ Lift Cladding Ect.
- ◆ Laser Cutting

## BENDING MACHINE

Scissors metal Band Sawing machine's main drive system is composed of worm reducer, pulleys, drive wheels and other components, worm gear reducer and the drive wheel is connected directly, the transmission is relatively stable, there is no impact.
